

INFRASTRUCTURE STIMULUS FUND Project Application

PROPONENT	Halifax Regional Municipality
PROJECT CATEGORY*	Solid Waste Management Infrastructure
CLASS OF ASSET*	Local Government Asset
PROJECT NAME	Waste Stabilization Facility Roof
PROJECT DESCRIPTION	Replacement of the roof on the high rate composting facility at the Otter Lake Landfill. This would be a 3 phased project. Phase 1, which would begin this fall, would reinforce the existing structure, Phase 2 would be to construct a new roof using the existing roof as a platform and Phase 3 would be removing the old roof.
PROJECT BENEFITS	Replacement of the roof is necessary as the existing roof is not compliant with the National Building Code of Canada. The high humidity and the compost gases have consumed the zinc coating used to protect the steel at a faster than normal rate. The replacement of the roof will allow for the implementation of a more advanced polyurethane foam coating system which will better protect the steel from the corrosive gases.
