Scott LeBlanc, HRM Planning Technican

Jan Skora, HRM Architect

Workshop Summary

Staff presented criteria for identifying important features that may shape the pattern of development as follows:

Primary Conservation Areas	Secondary Conservation Areas	
<ul style="list-style-type: none"> • significant forested areas • steep slopes • riparian areas • wetlands • unstable soils 	<ul style="list-style-type: none"> • walking trails • bicycle routes • legacy trees • country lanes • farm fields • historic trails and waterways 	<ul style="list-style-type: none"> • significant land marks • highway design • terminating vistas • open fields • scenic views • archaeological sites

The workshop participants identified the above-noted criteria deemed important to the Fall River Centre as illustrated on the January 20, 2009, Fall River Village Workshop Summary Map.
