Item No. 10.3.1

# **Urban Wildlife Feeding**

#### **Natural Resources**

*November 2<sup>nd</sup>, 2017* 

## Human-Wildlife Conflict

#### **IMPACTS**

**Property Damage** 

Human Health & Safety

Pet Health & Safety

Wildlife Health, Safety, & Populations

Nuisance

Agricultural Animals

Crops

Gardens

Social Disputes

Fear

### **Species Profiles: Food Attractants and Impacts**

- Intentional Feeding
- •Bird feeders (feeders and broadcast)
- •Garbage/compost
- •Pet food
- •BBQs

#### <u>BEAR</u>

- Damage to property
- •Food conditioning, habituation, proximity tolerance
- Physical risk to humans
- Nuisance
- •Illegal hunting
- Fear/sensationalism

# Species Profiles: Food Attractants and Impacts <u>DEER</u>

- •Intentional Feeding
- •Garden plants (edible and ornamental)

#### •Fruit trees

- •Deer-vehicle collisions
- •Ticks/Lyme disease
- Physical injury to humans/pets (rare)
- •Property damage, food loss (gardens)
- Nuisance
- •Injury/harm to deer

## Species Profiles: Food Attractants and Impacts

- Intentional Feeding
- •Bird feeding (broadcast, or fallen feed)
- •Garbage/compost
- Lawn invertebrates
- •Feral cat feeding
- Outdoor pet food

#### RACCOON

- •Injury to pets/human (scratch/bite)
- •Wildlife/pet disease/parasite (parvovirus, raccoon roundworm, leptospirosis, distemper)
- •Human health (lepto, roundworm)
- Raccoon death (trapped in green bins)
- •Latrines (disease risk)
- Property damage

# **Species Profiles: Food Attractants and Impacts**

- Intentional Feeding
- •Bird feeding (broadcast, or fallen feed)
- •Garbage
- •Fallen fruit
- •Feral cat feeding
- •Outdoor cats

#### COYOTE

- Habituation, familiarization, proximity tolerance, behavioural changes (potentially aggressive, dangerous)
- Loss/injury to pets
- •Wildlife/pet disease
- Fear/sensationalism

# Species Profiles: Food Attractants and Impacts <u>BIRDS</u>

- Intentional Feeding
- •Bird Feeders
- •Garbage

Property/vehicle damage (feces)
Human health risks (parasites, pathogens)
Wildlife disease (e.g. trichomonosis)

#### **NON-TARGET SPECIES**

- Any feeding increases small rodent populations - RATS
- Increase predators (coyote, fox, housecat)
- Property damage
- •Disease/parasites

#### SOCIOECONOMIC IMPACTS

- Quarrels among neighbours
- •Government resources (time/staff/education)
- •Costs of managing impacts
- •Fear/contempt of wildlife

### Recommendations

- Other jurisdictions successes/failures
- Awareness/Enforcement
- Intentional/unintentional feeding
- Wildlife-proofing green bins
- Partnership with province
