Identifying Stakeholders Tool

The following table can be used to identify potential stakeholders and the ways in which they could be involved to help support the food assessment.

The first column should be used to identify groups and individuals in your community that would be interested in the food assessment process. The second column should be used to identify what stake they have in the food system. The third column should be used to identify how they can participate in the food assessment and the actions to be taken afterwards.

Stakeholder Name	What is their interest in a food security assessment	How can they be involved
