206	2021-11-14 07:19:32	Yes	B3T1J7	Yes	Yes	No	People will not play by the rules and the waste will ultimately end up where it is not suppose to. Some people are honest , but when it comes to disposing hard to get rid of materials, people will break the rules thinking their little bit of garbage won't affect the environment. This is what people will do when not strictly enforced or supervised.

		Response	Open-Ended Response	Response	Response	Response	Open-Ended Response
261	2021-11-21 21:23:53	Yes	B3T1G5	Yes	Yes	No	If everyone followed the rules we wouldn't need police. There will be people who violate the rules. Those people will also be more likely to properly secure their load so an increase in traffic to the landfill will likely result in an increased risk of garbage blowing into vehicle paths on highway 103.
262	2021-11-21 19:24:14	Yes	B3T1K8	Yes	Yes	No	You mentioned that some on-site impacts have been identified as representing a medium risk which includes increased disposal area traffic and worker safety. Also, with the removal of the sorting process, there will be an increase of rats, flies and harmful odour, which puts the workers at risk of contracting diseases

This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.

722	2021-11-12 08:13:27	Yes	B3T1H9	Yes	Yes	No	The residents of the surrounding communities agreed to the placement of Otter Lake with the understanding that the FEP and WSF would be active throughout the lifespan of the facility. This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.

Also it isn't a Medium Risk it is a High risk which will guarantee to hit and become an issue. Unless your Risk Advisor is predicting this is the first time in history that the impact will be that the increased attraction of birds that will happen will only be birds that are trained to stay in the landfill.

261	2021-11-21 21:23:53	Yes	B3T1G5	Yes	Yes	No	Rats are extremely resourceful and adaptable. They have managed to extend their range to almost all of North America. I do not feel baiting will be effective at preventing them from leaving the facility. It may help control numbers at the facility but there will be an increased likelihood of rats leaving the facility and establishing themselves in the surrounding area.
262	2021-11-21 19:24:14	Yes	B3T1K8	Yes	Yes	No	It appears that the baiting system is insufficient to offset the increase number of rodents because the rodents will multiply faster than the baiting system will remove them.

327	2021-11-19 09:32:40	No	B3Z1A1	Yes	Yes	No	The FEP & WSF were critical components of the contract the communities accepted. The tactics used by HRM in attempt to remove the FEP & WSF are abhorrent and not in good faith. The format of this "survey" is a disgusting reminder of the lengths policy makers will take.
333	2021-11-19 08:29:03	Yes	B3T1G3	Yes	Yes	No	Same reason for my previous question. Organic materials are not meant for this landfill and as such, there needs to be a process to address organic materials that arrive. This was the original agreement with the community and must be honored

367	2021-11-17 12:59:17	Yes	B3T1G3	Yes	Yes	No	There is already a huge rodent problem in this area. Removing FEW/WSF will only provide the rodent population a food source and allow the population to grow. 593	2021-11-13 11:16:36	Yes	B3T1N3	Yes	Yes	No	There is already a rodent problem in the communities surrounding the waste facility. Meaning that current mitigation efforts are not effectively handling off site impacts. If waste is no longer sorted the potential for increased rodent attraction is greater. Naturally the rodents will migrate to the surrounding areas. The negative effects for off site are larger than assessed.
597	2021-11-13 11:05:13	Yes	B3T1C6	Yes	Yes	No	We already have issues with rodents in the Timberlea area. Changing the way of dealing with waste will just add to the problem.

722	2021-11-12 08:13:27	Yes	B3T1H9	Yes	Yes	No	The residents of the surrounding communities agreed to the placement of Otter Lake with the understanding that the FEP and WSF would be active throughout the lifespan of the facility. This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.
724	2021-11-12 07:53:21	Yes	B3T1E8	Yes	Yes	No	Additional waste and less controls of the garbage deposited at the landfill will attract rodents. Once the controls are removed, they would never be reintroduced. Don't stop what is already working. If you wish to stop, relocate the facility.

744	2021-11-11 16:28:40	Yes	B3T1N3	Yes	Yes	No	We already have a rodent problem in Timberlea with the current baiting system, I doubt these measures will do enough to mitigate the very likely rodent increase that the change to this area will result in.
750	2021-11-11 12:46:39	Yes	B3T1E8	Yes	Yes	No	Additional food waste in the landfill will attract more rodents than would be possible to bait or trap. Halifax is the 4th rattiest city in the Maritimes. It would be less expensive and more effective to retain and / or enhance the FEP to eliminate food waste from the landfill.

868	2021-11-09 22:33:05	Yes	B3T1G5	Yes	Yes	No	Timberlea already has a huge rodent / rat problem. I feel this is only going to get worse . This was never suppose to be a non sorted , dump and go landfill
869	2021-11-04 15:25:43	Yes	B3T1J4	Yes	Yes	No	You cannot believe that the rodent are only going to go directly to the on-site. Yes it will attract them even more which in turn will attract rodents in the on-site and they will not all be baited and will keep on looking around off-site as some communities are already too close..
871	2021-11-09 21:27:52	Yes	B3T0A6	Yes	Yes	Yes

873	2021-11-09 20:48:16	Yes	B3z1b5	Yes	Yes	No	It was agreed we'd have a state of the art landfill that would prevent this crap and now you're trying to go back on your word with a system that won't work. I thought the original life expectancy was 20 years or less. It seems we're already there, so now you think it's a good idea to start dumping raw garbage in an area surrounded by lakes.
874	2021-11-09 21:05:55	Yes	B3Z4L5	Yes			
875	2021-11-09 20:02:17	Yes	B3Z1L2	Yes	Yes	No	If you a very minimal problem now with rodents due to the FEP, then why mess with something that's working? Instead, you spread poisonous over a much larger area affecting more animals. Absolute insanity.

886	2021-11-09 19:32:11	Yes	B3Z1B7	Yes			
891	2021-11-09 19:10:01	Yes	B3t1c7	Yes	Yes	No	We already have a serious rat problem close to the dump and it will no doubt not help the situation

894	2021-11-09 17:54:43	Yes	B3T0A4	Yes	Yes	No	Rodents continue to be attracted to the area. No mitigation process: will 100% address this issue.
896	2021-11-09 18:21:25	No	B3Z1B5	Yes	Yes	No	There will definitely be more rodents and these mitigation measures will not stop them. There will be more rodents that will spread to surrounding (residential) areas
897	2021-11-09 18:06:35	No	B3Z1A7	Yes			
898	2021-11-09 17:38:11	Yes	b3t1g7	Yes	Yes	No	the amount of rodents in the neighbourhoods surrounding the landfill have steadily increased over the last several years, anticipate this increasing exponentially

902	2021-11-09 16:58:34	Yes	B3T1G7	Yes	Yes	No	We have a ridiculous amount of rats in the area noe and this will make it worse, baiting will effect wild and domestic animal, water pollution and effects the entire environment.
903	2021-11-09 16:14:02	Yes	B3Z1L2	Yes	Yes	No	Same as my previous comment
904	2021-11-04 18:05:37	Yes	B3T1H8	Yes	Yes	No	Where is the data supporting the claim of no off site impact? Has a decommissioned FEP/WSF been studied? Have several?
909	2021-11-09 16:32:47	Yes	B3t1g1	Yes	Yes	No	I don't think enough is being done to control rodents. I have lived in Timberlea for over 20 years, and believe there has been a dramatic increase in rodents since the landfill was put in.
910	2021-11-09 16:23:16	Yes	B3T1G1	Yes	Yes	No	Deactivating the FEP/WSP will likely lead to more organic material in the landfill. I am unclear on how this reduces the number of rats attracted.

916	2021-11-09 15:49:15	Yes	B3T1E4	Yes	Yes	No	Because these mitigation measures are not entirely effective. Why is this facility in such close proximity to residential areas? There are rats out on the streets even during daylight hours.
919	2021-11-09 15:28:47	Yes	B3T1H9	Yes	Yes	No	Rats are rats
924	2021-11-09 14:51:54	Yes	B3T1J1	Yes	Yes	No	Generally baiting programs are not effective if the food source is maintained for the rodents. This will result in a net increase to the rodent population

946	2021-11-09 12:50:39	Yes	B3T1J9	Yes	Yes	No	Baiting will not be an effective measure. Once rodents arrive in larger numbers they will disperse into areas far beyond the landfill disposal site.
948	2021-11-09 12:30:38	Yes	B3T1J5	Yes	Yes	No	Baiting will only work minimally and will present a risk to animals who might feed on poisoned rats depending on the type of bait used. The best measure is not removing the measures that already work.
950	2021-11-09 11:29:08	Yes	B3T1C1	Yes	Yes	No	You are all literally so dumb it amazes me. You will not control an ALREADY out of control rodent issue we experience in this area by adding more open pollution to our area. Give your head a shake
954	2021-11-09 11:42:48	Yes	B3t1e7	Yes	Yes	No	I have lived in timberlea for [redacted] yrs. Since the existing dump has been here the rats have been ramped and the smell on some days is enough to make you sick.

987	2021-11-09 07:27:43	Yes	B3T1G1	Yes	Yes	No	Timberlea is already infested with rats the current measures are not enough. De-activating the FEP/WSF will only make things worse.

990	2021-11-04 07:05:57	No	B3T1G6	Yes	Yes	No	Rodents are a problem in our area now and will only get worse. It is not so much the delivery of rodents to the area but the growing population that already exists and will continue to grow.

993	2021-11-09 05:59:40	Yes	B3T1J3	Yes	Yes	No	Adding poison to a area close to my home is very concerning. Espically with the risk of it escalating up the food chain, or it being inadvertently moved. This ever so slightly increases the risk that a lost pet may be poisoned by the change.
998	2021-11-09 04:34:13	No	B3Z1B5	Yes			
999	2021-11-08 23:44:20	Yes	B3T2K4	Yes	Yes	No	So your risk is that it will increase the attraction of rats (which is an issue as it will happen and not a risk) and you are going to invest in rat poison to fix it. A mitigation to the risk would be something to avoid the risk. The mitigation being to the risk would be to not deactivate the FEP WSF. There is a difference.
1000	2021-11-08 22:51:36	Yes	B3z1b6	Yes	Yes	No	I don't have confidence in the sincerity of a biased report, written with the purpose of justifying deactivation of this part of the facility. The residents of this area were promised by the council of the day that front end sorting would be a permanent part of the Otter Lake landfill.

1025	2021-11-08 17:53:19	Yes	B3Z1A8	Yes	Yes	No	Due to the increased rat problem on our property we have now had to implement, at our expense, yearly rodent control measures to decrease their presence on our patio and lawn areas during the milder seasons. clearly this problem is increasing despite your present efforts as we did not have issues in earlier years.

1453	2021-11-05 00:32:01	Yes	B3T1H7	Yes	Yes	No	Timberlea is well known for having a rat problem that the city has not done enough to mitigate. Residents have rodent chew through their car wires and the last house I rented as well as two neighbours have rats climb under the siding into the roofs in governors Glen causing thousands of dollars in damage. My concern is HRM has gone back on their promise to close Otter Lake.

1673	2021-11-04 04:03:06	Yes	B3T1J9	Yes	Yes	No	Just saying baiting will happen doesn't give actual verified numbers and percentages of successful mitigation. We aren't talking about a few dozen rats. Unchecked, who's to say we might not get hundreds and hundreds of rats and lord knows what else. The rate of baiting would have to be astonishingly large. Prove it can be done.

1770	2021-11-03 17:30:19	Yes	B3t1g2	Yes	Yes	No	Rodents are already a huge issue and increasing landfill dumping is going to create an exponential increase in rodents
1771	2021-11-03 17:23:02	Yes	B3T1N3	Yes	Yes	No	This will attract so many more pests, which will then spread to the surrounding communities who only agreed to this landfill if there was a sorting facility.An agreement was signed. You cannot violate it at your convenience.

1780	2021-11-03 16:41:40	No	B3T1G4	Yes	Yes	No	I feel the deactivation process will bring more rodents
1784	2021-11-03 16:30:37	Yes	B3t1n3	Yes	Yes	No	Rats are already an issue. So you will just make it worse
1787	2021-11-03 16:24:36	Yes	B3T1G4	Yes	Yes	Yes	
1790	2021-11-03 15:18:48	Yes	B3T1J9	Yes	Yes	No	There are so many faults in Timberlea. We see them all the time, despite residents efforts to control them. This is while the FEP/WSF is still in place. You lie if you say deactivation will not impact the rat population. It is disgusting.
1791	2021-11-03 15:48:28	Yes	b3t1c6	Yes	Yes	No	rodents are already a large issue within the community - with the construction at Brunello these rodents moved into other subdivisions. More food sources means more rodents
1792	2021-11-03 15:54:37	Yes	B3T1G3	Yes			
1794	2021-11-03 15:02:31	Yes	B3T1E6	Yes	Yes	No	Timberlea has a long term known issue with rodents, esp rats...2as it is and we donot need anything to attract more to the area. Baiting programmes can harm other animals and/or pets
1796	2021-11-03 15:29:10	Yes	B3T1J6	Yes	Yes	Yes	
1798	2021-11-03 15:24:18	Yes	B3T1C6	Yes			
1799	2021-11-03 15:11:55	Yes	B3t1c7	Yes	Yes	No	So you'll add more of a food source for wildlife then kill them?

1807	2021-11-03 14:48:59	Yes	B3t1h8	Yes	Yes	No	I don't believe baiting will be enough to control the increase that will be seen in the area
1808	2021-11-03 14:48:41	Yes	B3t1n8	Yes	Yes	No	
1809	2021-11-03 14:43:40	Yes	B3T1N6	Yes	Yes	No	If on site there will be more offsite too
1813	2021-11-03 14:09:13	Yes	B3T1K7	Yes	Yes	No	The surrounding communities already have an extensive issue with rodent control. If you deactivate the FEP/WSF and rely only on "more baiting" I worry about an even great influx of rodents in our neighbourhoods. Making them less sanitary for our children, decreasing the real estate values and also giving the communities a stigma.
1815	2021-11-03 14:25:59	Yes	B3T0A6	Yes	Yes	No	It's not enough!!
1819	2021-11-03 14:10:05	Yes	B3T1G8	Yes	Yes	No	Again you dont know the full level of the increase
1820	2021-11-03 13:05:14	Yes	B3T1H9	Yes	Yes	No	I have lived in Timberlea since the inception of this bitterly opposed project and have witnessed the advent of the growing rat presence in the surrounding areas.If HRM were interested in doing a survey approx to this concern,it would signify that this problem is extant.
1821	2021-11-03 13:05:04	Yes	B3T1J4	Yes	Yes	No	Wait until all the extra unchecked crap gets sent into the landfill....rat heaven!!

1822	2021-11-03 12:16:49	Yes	B3t1n8	Yes	Yes	No	We already have a massive rat problem in Timberlea and baiting and trapping does not work if there is a massive food supply. They will keep coming back or reproduce quicker. Remove acces to food and they leave
1823	2021-11-03 13:04:31	Yes	B3Z4M2	Yes	Yes	No	this is a big concern.

1826	2021-11-03 12:09:07	Yes	B3T1E8	Yes	Yes	No	You say there are no offsite rodent issues, have you asked the people who live nearer to the dump?
1827	2021-11-03 12:23:59	Yes	B3T1E3	Yes	Yes	No	
1828	2021-11-03 12:00:58	Yes	B3T1G1	Yes	Yes	No	I'm not interested in "mitigation". HRM promised to maintain the waste facility at a very high level, and I expect HRM to keep its promise to the community. We will not need "mitigation" if HRM does not downgrade the quality level with which it has been running the facility. I DO NOT AGREE WITH THE PROPOSED AMENDMENTS.

1833	2021-11-03 09:50:24	Yes	B3T1J4	Yes	Yes	No	If there is an increase in rodents on-site, it stands to reason there will also be an increase off-site
1834	2021-11-02 14:13:03	Yes	B3T1G1	Yes	Yes	No	The increased food source will increase population and breeding. Not just at the site but the surrounding communities.

Respondent	Start Date	Do you live within 5 km of the FEP/WSF?	Please provide your postal code. E.g., A1A2B2	With respect to the proposed deactivation of the Otter Lake FEP/WSF, do you have concerns regarding potential negative impacts?	Are you concerned with the additional generation of greenhouse gases?	Does the existing approach address your concerns?	If No, please indicate why the existing approach does not address your concerns and/or any additional concerns you may have with this specific item (400 character limit):

327	2021-11-19 09:32:40	No	B3Z1A1	Yes	Yes	No	The FEP & WSF were critical components of the contract the communities accepted. The tactics used by HRM in attempt to remove the FEP & WSF are abhorrent and not in good faith. The format of this "survey" is a disgusting reminder of the lengths policy makers will take.
333	2021-11-19 08:29:03	Yes	B3T1G3	Yes	Yes	No	I support the existence of the FEP/WSF. There may be other sources for energy that would reduce greenhouse gasses.

337	2021-11-18 19:34:24	Yes	B3T1c1	Yes	Yes	No	The fact that the two prices of equipment do something to mitigate the issue of greenhouse gases is a good reason to continue using them. If the net impact of running them betters the Gas emissions, why are we going backwards.

341	2021-11-18 13:22:55	Yes	B3Z1A4	Yes	Yes	No	I am not confident that removing the FEP will not affect gas emission. Instead of using electrical power as an excuse, why isn't solar power generation and storage being installed onsite?

365	2021-11-16 12:57:50	Yes	b3t1h9	Yes	Yes	No	I do not want any additional organics placed in the landfill not to mention other toxic materials. With no front end sorting who knows what will wind up in the landfill.
367	2021-11-17 12:59:17	Yes	B3T1G3	Yes	Yes	No	Rather than saying that it is okay to allow organic material into the landfill because the net amount of greenhouse gases produced is less than the electricity used to separate the organic materials, you should be consider greener sources of energy for that separation and keep the organics out of the landfill. This will allow even less greenhouse gas emissions.
370	2021-11-17 12:04:06	Yes	B3Z1A9	Yes	Yes	No	Organic waste does not belong in a landfill

The horrible stench from the landfill in the previous location is actually burned into my brain and I'd be beyond pissed for that to happen again basically in my backyard
722	2021-11-12 08:13:27	Yes	B3T1H9	Yes	Yes	No	The residents of the surrounding communities agreed to the placement of Otter Lake with the understanding that the FEP and WSF would be active throughout the lifespan of the facility. This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.
724	2021-11-12 07:53:21	Yes	B3T1E8	Yes	Yes	No	With the elimination of the FEP/WSF, more composing material will end up in the wrong area of the facility. I worry that if this is deactivated, it will never come back online. When we're of coal and using renewables, are we going to reactivate the processor and save those gases? I'm guessing not. Let's keep that food out of the landfill and as the province moves toward green energy we'll save the gases in all areas.

If that is true, any organic item only has a specified potential energy. If this is accerated we should have a shorter tie for treatment overall. Reducing long term costs and returning the site to nature in less than 50 years after closure.

Claiming there are no off-site effects is ridiculous. HRM is trying to pacify residents with this survey and justify their plan.

452	2021-11-15 18:47:18	Yes	B3Z1B5	Yes	Yes	No	Again, this is a solution that comes from your change that creates a problem in the first place. We have not had problems with odours since the current decomposition is working. This entire survey is leading respondents to approve a measure that you want approval for ... it is biased in its approach.

464	2021-11-15 15:25:06	Yes	b3t1h9	Yes	Yes	No	We will bury it faster just means you're accepting that waste that shouldn't go into the facility will end up there without the FEP. This creates a new problem and these "solutions" just address some of the most noticeable symptoms.
465	2021-11-15 15:35:49	Yes		Yes			
466	2021-11-15 15:32:08	No	B3Z0P7	Yes			
471	2021-11-15 12:25:46	No	B3T1H8	Yes	Yes	No	You say you'll continue with your current measures regardless, i.e. nothing changes - yet you're cutting the machines that reduce offensive waste. It doesn't add up. There will be more offensive waste, so logically, more odours - and even if those don't reach human nostrils they remain a powerful attractant to wildlife, increasing contamination of the environment.

718	2021-11-12 08:56:42	Yes	B3T1N7	Yes	Yes	No	There's no way to mask the smell when garbage will continuously be dropped in there
722	2021-11-12 08:13:27	Yes	B3T1H9	Yes	Yes	No	The residents of the surrounding communities agreed to the placement of Otter Lake with the understanding that the FEP and WSF would be active throughout the lifespan of the facility. This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.
724	2021-11-12 07:53:21	Yes	B3T1E8	Yes	Yes	No	BLT is a growing and thriving community. Reducing a process in this system that is already proven is a mistake and concern to the community. Odour is one of the major impacts to our communities and it affects quality of life. It will occur as the wrong garbage will end not sorted correctly.
727	2021-11-12 08:13:51	Yes	B3Z4M9	Yes	Yes	No	Not an improvement. Just more risk.

744	2021-11-11 16:28:40	Yes	B3T1N3	Yes	Yes	No	I'm sorry, but I highly doubt that any of these changes are going to help with odors being emitted, and living "downwind" of this area as someone who spends a great deal of time outdoor I do NOT need to be smelling this crap at my house. I do not want any current/future children in this area also being affected by what will likely be reduced air quality that would be the result of these changes
750	2021-11-11 12:46:39	Yes	B3T1E8	Yes	Yes	No	Again, without the FEP to prevent an increase of organic materials into the landfill there will be additional generation of decomposition gases having unpleasant odors. Odors from the existing landfill can already be noticed on occasion during the summer. Any increase is absolutely unacceptable.

860	2021-11-10 06:26:28	Yes	B3T1G5	Yes	Yes	No	It is easy to say that there will not be an increase in odors - but what happens if this does not turn out to be the case - Timberlea loses and no one will care - it will be done.

868	2021-11-09 22:33:05	Yes	B3T1G5	Yes	Yes	No	If odour is an issue then why not moved the landfill out of any residential area . Brunello estates will have a hard time selling property with garbage smell 24/7 not to mention people playing golf and the children inhaling this in the neighborhood
869	2021-11-04 15:25:43	Yes	B3T1J4	Yes	Yes	No	FEP/WSF is a requirement as per the 1999 Agreement. I do not believe that by removing these two systems and increased organic matter and materials. That we will not have an issue with odour and gases.

875	2021-11-09 20:02:17	Yes	B3Z1L2	Yes	Yes	No	There has been no evidence of noxious smells from the landfill in my area since it's inception. You're grasping at straws to get the public on your side I don't believe anything that comes from Dillon. They lied prior to the installation of the landfill 20 years ago, and they're probably lying now.

902	2021-11-09 16:58:34	Yes	B3T1G7	Yes	Yes	No	As a long term resident we know this is going to increase the horrible smell that comes from landfills which is why we didn't want it to begin with. The current process speeds of the process and also helps decompose any smells faster. We were promised to not have this become a landfill! Again unacceptable!

999	2021-11-08 23:44:20	Yes	B3T2K4	Yes	Yes	No	You are wrong. This change to save a measly 2 Million a year will definitely create odours. The FEP/WSF was part of the agreement in putting Otter Lake in. We are all concerned about the increased odour in our community that will definitely with this mistake when you force the change. You don't live here and don't care but we all feel cheated

1162	2021-11-07 16:10:15	Yes	B3T1E2	Yes	Yes	No	If this change is supposed to reduce the smell, why hasn't it already been implemented? There have been many days in the past 5-10 years when the smell from Otter Lake has made eating a meal difficult because the air is just too rank.

1196	2021-11-07 10:50:23	Yes	B3T1E7	Yes	Yes	No	The changes WILL increase odor, as noted above. The plan is just to maintain current measures. Will the FEP be re-instated if there is odors in the community? I doubt it. Since HRM seems intent on breaking the original agreement in order to save money, I doubt very much they will reinstate it.

1349	2021-11-05 18:58:14	Yes	B3t1k7	Yes	Yes	No	I'm sorry but it's already pretty smelly around our neighbourhood on mornings that it is cloudy and rainy. I just find it hard to believe that we're going to increase the amount of food in the landfill and that won't have a negative impact on the smell. If the plan is to use existing measures, the smell will be worse because the existing measures do not take care of the smell as it is.
1352	2021-11-05 18:45:51	Yes	B3t1e9	Yes	Yes	No	Deactivation will result in increased odours. Sever odours that once becomes an prominent will be next to impossible to get rid of. 1807	2021-11-03 14:48:59	Yes	B3t1h8	Yes	Yes	No	What are the proactive monitoring measures. Just saying you are going to be proactive does not exactly deal with concerns
1808	2021-11-03 14:48:41	Yes	B3t1n8	Yes	Yes	No	
1809	2021-11-03 14:43:40	Yes	B3T1N6	Yes	Yes	No	It will definitely smell worse!!
1813	2021-11-03 14:09:13	Yes	B3T1K7	Yes	Yes	No	As it is currently maintained, we are stable with reducing the amount of odour from the landfill. Eliminating any measure puts all of our quality of life, property values and pride in community in jeopardy. I am significantly opposed to trialling this and finding out that the mitigation efforts were inadequate.
1815	2021-11-03 14:25:59	Yes	B3T0A6	Yes	Yes	No	It's not enough and I don't believe it.

1820	2021-11-03 13:05:14	Yes	B3T1H9	Yes	Yes	No	There were incidents of putrid air emanating from the facility & I believe your proposals to mitigate this will not be affective.
1821	2021-11-03 13:05:04	Yes	B3T1J4	Yes	Yes	No	More garbage that doesn't belong in the landfill will smell...like a few years ago when the rancid smell reached our house...
1822	2021-11-03 12:16:49	Yes	B3t1n8	Yes	Yes		There are days in the summer where you already get a smell. Take away processing equipment that is reducing the smell to what we have now and it will only get worst

1826	2021-11-03 12:09:07	Yes	B3T1E8	Yes	Yes	No	Why would I take your word that there would be no more smells. At least at this point we know what to expect but what if it is worse...once this has been put into place good luck ever getting it reversed if need be
1827	2021-11-03 12:23:59	Yes	B3T1E3	Yes	Yes	No	
1828	2021-11-03 12:00:58	Yes	B3T1G1	Yes	Yes	No	I'm not interested in "mitigation". HRM promised to maintain the waste facility at a very high level, and I expect HRM to keep its promise to the community. We will not need "mitigation" if HRM does not downgrade the quality level with which it has been running the facility. I DO NOT AGREE WITH THE PROPOSED AMENDMENTS.

The recent issue in Iqaluit highlights how easily this can happen and go undetected and unaddressed. The history of Shelbourne water supply contamination also highlights this concern.

323	2021-11-19 09:53:08	Yes	B3t1g6	Yes	Yes	No	No it sounds like a lawyer side stepping in wording what was promised to the community by the politicians of the day. This is why the lack of trust! Leagal loop holes and playing on wording make this seem like we are dealing with a sleazy ambulance chaser rather than people we are paying.
324	2021-11-05 19:00:42	No	03z1a4	Yes	Yes	No	Completely disagree with your agreement interpretation narrative. Honour the original intent of the agreement.

327	2021-11-19 09:32:40	No	B3Z1A1	Yes	Yes	No	The FEP & WSF were critical components of the contract the communities accepted. The tactics used by HRM in attempt to remove the FEP & WSF are abhorrent and not in good faith. The format of this "survey" is a disgusting reminder of the lengths policy makers will take.
333	2021-11-19 08:29:03	Yes	B3T1G3	Yes	Yes	No	NO!! only "Acceptable waste" should be included therefore there MUST be a process to address unacceptable waste that arrives at the facility. Just because "most of the waste" that arrives at the facility is inert, does NOT mean we eliminate the processes and facilities to deal with the non-inert waste that arrives at the facility.

337	2021-11-18 19:34:24	Yes	B3T1c1	Yes	Yes	No	Although it's not specifically noted in the agreement, this change goes against the spirit of the law where it's assumed that the dump operations are as originally designed. We again shouldn't be reverting operations to a less effective plan

341	2021-11-18 13:22:55	Yes	B3Z1A4	Yes	Yes	No	I understand the logic of the argument against keeping the FEP but there is no actual proof that the situation will not degrade. Do you think the people who live close by the landfill are incapable of contributing to this decision? Why do they and so many others want the FEP to remain? How much money will wealthy HRM "lose" if the FEP continues?
345	2021-11-18 07:07:28	Yes	B3T1C1	Yes	Yes	No	Again the trust factor whatever the new plans may be ... what assurances are there they will be upheld and what is the plan for a go forward if the current plans fail?

365	2021-11-16 12:57:50	Yes	b3t1h9	Yes	Yes	No	This is nothing more than a complete betrayal of the BLT community. This community made it very clear when the otter lake facility was proposed they did not want a dump. To imply that we misunderstood the promises made at the time are at best insulting and frankly a cynical declaration of HRM's intent.
367	2021-11-17 12:59:17	Yes	B3T1G3	Yes	Yes	No	Organic waste is not "inert", "stable" or "residual". It is not "acceptable material." It is not what this facility was designed for. Why does HRM want to go backwards in how they treat/handle waste?
370	2021-11-17 12:04:06	Yes	B3Z1A9	Yes	Yes	No	HRM is continuing to go against all of the feedback from community meetings and community monitoring committee and remove safeguards promised and which were likely the only reason this was originally approved! Honour the original agreement!

385	2021-11-16 20:37:49	No	B3z4e9	Yes	Yes	No	Pretty disingenuous logic. You skirted most of the rules by diverting institutional waste outside HRM where it need not be treated polluting other parts of NS, and now now want to avoid treating what remains in HRM. Extending the life of the dump by piling garbage higher violates the spirit of the agreement

426	2021-11-16 06:54:36	Yes	B3Z1B5	Yes	Yes	No	Most of the waste currently delivered to and disposed of at Otter Lake is considered Inert Materials or Residual Materials, such that it does not need to be biostabilized prior to landfilling. 484	2021-11-04 11:52:49	No	B3Z1A5	Yes	Yes	No	the agreement for the town dump in "my backyard ie otter lake" was agreed to for 25 years back in 1997. although having a dump so close was upsetting, it was "our turn" to have it. how very frustrating to have that deadline extended AND changes made (ie. no longer will 4000 tons of decaying matter be discovered prior to burial, as in 2019). It's time to locate the dump elsewhere..

486	2021-11-15 08:43:10	No	B3T1J1	Yes	Yes	No	No hard evidence has been given that HRM will remain compliant. Data could easily be collected (decrease in food waste/non-compliant materials picked up by the FEP/WSF, as one example) that would go a long way in addressing concerns, but to the best of my knowledge, all assertions are based on conjecture only.

722	2021-11-12 08:13:27	Yes	B3T1H9	Yes	Yes	No	The residents of the surrounding communities agreed to the placement of Otter Lake with the understanding that the FEP and WSF would be active throughout the lifespan of the facility. This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.
724	2021-11-12 07:53:21	Yes	B3T1E8	Yes	Yes	No	This agreement with the CMC is like any other agreement that large business and HRM Council have, they don't follow the recommendations or support of these community groups. It's easy for other councillors to vote for the elimination of this process as the facility doesn't impact their communities. Let's honour the original expiry date agreement of this facility.

750	2021-11-11 12:46:39	Yes	B3T1E8	Yes	Yes	No	At the very least the FEP is a safety net to insure that all of the material being landfilled is "inert" or "residual". If the FEP is removed there is no safeguard in place and any future changes in the waste stream heading for landfill will not be detected or remediated. If the FEP is removed, the Otter Lake Landfill must be decommissioned.

We've had the landfill in outer backyard for the last 20 years and to say there is no negative impact is not true. You can smell a stink when you pass the Timberlea exit on many days.

875	2021-11-09 20:02:17	Yes	B3Z1L2	Yes	Yes	No	By your own admission, the agreement stipulates that only waste bio-stabilized through the FEP is acceptable. You are putting the safety of our communities at risk for the sake of saving 2 million dollars. That is a pittance in the budget of HRM and it makes zero sense to me to remove something that has been working so well for 20 years.

894	2021-11-09 17:54:43	Yes	B3T0A4	Yes	Yes	No	Referencing terms of an agreement from 1999 is insufficient given we are now living in a different world, with different materials being disposed of. Be current and be proactive and honor the intent of this agreement - to protect the local people living near the waste facility. The response of HRM in this regard is completely disheartening.

898	2021-11-09 17:38:11	Yes	b3t1g7	Yes	Yes	No	If the process was deemed necessary originally, to say that "The agreement does not specifically mandate" sounds more like a cop out than a scientific reason why it would no longer be needed.
899	2021-11-09 17:30:26	Yes	B3T1E3	Yes	Yes	No	If the system we have is not the best in the world why do governments from all around the world come here to see the system.
902	2021-11-09 16:58:34	Yes	B3T1G7	Yes	Yes	No	Sad working their way around not honouring the promise of not making it a landfill it's supposed to be a waste treatment facility not a landfill you are ruining the community there's going to be an increase in pollution air water land and increasing infestation in rodents and birds and then an increase again in-depth just due to poisoning from your baiting practices
903	2021-11-09 16:14:02	Yes	B3Z1L2	Yes	Yes	No	Same as my previous comment. Also what happened to the 20 year agreement?
904	2021-11-04 18:05:37	Yes	B3T1H8	Yes	Yes	No	Once again, qualitative commentary for a quantitative issue. Show us the numbers. The raw data. By passing the community monitoring committee's role in the operation of Otter Lake is a misuse of power. It's almost as bad as this thinly veiled PR scheme you're trying to pass off as a survey.
909	2021-11-09 16:32:47	Yes	B3t1g1	Yes	Yes	No	Seems that the current interpretation of the agreement is different than what the community was led to understand when Otter Lake was under development

948	2021-11-09 12:30:38	Yes	B3T1J5	Yes	Yes	No	The agreement very clearly was intended to have the FEP/WSF as part of how they were going to make this site a well run and safe site. 1136	2021-11-07 20:16:23	Yes	B3Z1B2	Yes	Yes	No	There is no defensible reason for altering the agreement that was put in place when the Otter Lake facility was out in our neighborhood. There have been numerous reports that indicate that there is still a large proportion of the population not managing their waste properly thereby increasing the tonnage of waste to the landfill.

1141	2021-11-07 20:16:43	Yes	B3t1e2	Yes	Yes	No	Basically what you are saying is that the concerns of residents is secondary and that since you don't live in the area it doesn't matter

1153	2021-11-07 17:54:03	Yes	B3T1J8	Yes	Yes	No	Otter Lake has already caused numerous problems in our community, including odours and a terrible rat problem. Any proposed changes should be focussed on making things BETTER, SAFER, MORE environmentally friendly, not the other way around. It is time to find a new site.

1156	2021-11-07 17:17:16	No	B3T1J8	Yes	Yes	No	Stop being lazy, no one cares about "technically". There was an agreement with the community and you know you'll have trouble implementing a new site due to NIMBY. Rather than standing by the deal you're counting on a lack of participation during covid so you can be a lazy ass civil "servant"
1162	2021-11-07 16:10:15	Yes	B3T1E2	Yes	Yes	Yes	My greatest concern going forward is that the type of waste which has changed, will change again, and while there is a plan to keep this FEP in place, ready to work, what will happen in the meantime?
1164	2021-11-07 13:15:12	Yes	B3T1H4	Yes	Yes	No	Along with the written agreement, there were verbal agreements at the time that the processor and stabilization facility would remain as long as the landfill was open. organic waste is down to 44,000 tonnes but that is still a significant amount of odorous organic waste for the local community to deal with the ramifications of.

1171	2021-11-07 14:43:36	Yes	B3t1h8	Yes	Yes	No	You say the amount of organic waste sent to the land fill is 10% but you do not say 10% of what amount so it is unclear how much organic waste is actually sent to otter lake. I think all organic waste must be separated and treated before going in the land fill

1179	2021-11-07 13:49:37	Yes	B3T1J6	Yes	Yes	No	Rather than defunding the facility, if we truly believe that the FEP/WSF is no longer necessary, we should be investing funds required for its operation in newer and better tech. Otter Lake was world-class. Make it world-class again.

1393	2021-11-05 13:48:50	No	B3Z1A1	Yes	Yes	No	Citizens are not sorting their waste properly. I know this because, every week, I clean up the mess left behind by my neighbours' waste. I've found organic in black garbage bags and blue recycle bags that have been ripped open by crows. Without the FEP/WSF, a significant amount of organic waste will end up in the landfill. In 2021, that is entirely unacceptable.

1405	2021-11-05 11:53:21	Yes	B3t1g8	Yes	Yes	No	This sounds like trying to weasel out of an agreement by getting technical with terminology. This is HRM blatantly trying to go back on contracts and promises to save a buck at the expense of the community. Plain as day.
1406	2021-11-05 11:32:38	Yes	b3t1h2	Yes	Yes	No	According to HRM staff, 4,097 tonnes of putrescible organics – organic matter liable to turn putrid with decay – were found in the residential garbage that arrived at the Otter Lake facility in 2019. The tonnage represents 10-12 per cent of the residential waste received that year.

It's similar to COVID vaccination compliance. People try and skirt the regulations, especially "anonymous" apartment dwellers who throw everything onto their green bags and toss it into the building's dumpster. THIS is why you need separation processes.

1819	2021-11-03 14:10:05	Yes	B3T1G8	Yes	Yes	No	The city is nitpicking the wording of this agreement and that is not okay
1820	2021-11-03 13:05:14	Yes	B3T1H9	Yes	Yes	No	This is simply an obfuscation to cover a Peninsular HRM betrayal of a promise & eco-racism. Beechville's proximity to this facility has the stink of Africville. Yeah, that dump was next door too. Shame.
1821	2021-11-03 13:05:04	Yes	B3T1J4	Yes	Yes	No	I am so upset that this is even being considered...I don't believe the "sunshine and lollipops" information on this survey. By the time you decide that it needs to be turned on again it will all have to be repurchased and that cost will serve as another deterrent to turning it back on to fix what's gone wrong by turning it off in the first place.

575	2021-11-13 16:53:34	Yes	B3Z0E2	Yes	Yes	No	Plan is very shortsighted. Any savings will be eaten up by mitigation strategies if they even happen. Will set back environmental efforts. Reactivation of FEP/WSF will never happen when this is found to be disastrous. Very disappointed in HRM's ST thinking. Questionnaire is biased; only presents positive, neglects to share disadvantages if proposed mitigation strategies are not fully implemented.

593	2021-11-13 11:16:36	Yes	B3T1N3	Yes	Yes	No	My concern is that in the short term, maintaining facilities and equipment will be tolerated. I have no doubt that after a short time the costs associated with this maintenance will be scrutinized as a potential budgetary savings. It will be abandoned and the equipment sold off to offset costs.

722	2021-11-12 08:13:27	Yes	B3T1H9	Yes	Yes	No	The residents of the surrounding communities agreed to the placement of Otter Lake with the understanding that the FEP and WSF would be active throughout the lifespan of the facility. This move by the city is in blatant disregard of the original agreement, and while maybe not in violation of the specific provisions, is made clearly with disregard to the spirit of the agreement.

1826	2021-11-03 12:09:07	Yes	B3T1E8	Yes	Yes	No	First off if it's not going to cause any issues, as you say, then using the ability to be reactivated if needed is a strange argument. Are you sure or are you not? Secondly, we all know that saying it's easy to reactivate and actually getting it done can take a long time. Trying to get simple things like crosswalks and street lights can take years because of all the paperwork and red tape.
1827	2021-11-03 12:23:59	Yes	B3T1E3	Yes	Yes	No	
1828	2021-11-03 12:00:58	Yes	B3T1G1	Yes	Yes	No	I'm not interested in "mitigation". HRM promised to maintain the waste facility at a very high level, and I expect HRM to keep its promise to the community. We will not need "mitigation" if HRM does not downgrade the quality level with which it has been running the facility. I DO NOT AGREE WITH THE PROPOSED AMENDMENTS.

1833	2021-11-03 09:50:24	Yes	B3T1J4	Yes	Yes	No	Once it is deactivated it stands to reason that it will be very difficult to reactivate. There is a substantial cost involved in reactivation and that will certainly be the main deterrent brought up by HRM.
1834	2021-11-02 14:13:03	Yes	B3T1G1	Yes	Yes	No	You are in a dream if you thing reactivation a mothballed system 5,10,15 years from now is financially viable. Industry experts would disagree across many many less corrosive and inert environments. Keep it working, keep it maintained. Let it do the job it is meant to do.

Under no circumstances should our government be cutting costs at the expense of the environment, even in marginal amounts.

1821	2021-11-03 13:05:04	Yes	B3T1J4	Yes	Yes	When Otter Lake was placed in our community (a done deal) even before the options went to Council. The entire survey etc is not transparent/council is in conflict of interest - NIMBY...I pray the DOE turns it down. HRM will not save money in the long term.

1828	2021-11-03 12:00:58	Yes	B3T1G1	Yes	Yes	I'm not interested in "mitigation". HRM promised to maintain the waste facility at a very high level, and I expect HRM to keep its promise to the community. We will not need "mitigation" if HRM does not downgrade the quality level with which it has been running the facility. I DO NOT AGREE WITH THE PROPOSED AMENDMENTS.

1834	2021-11-02 14:13:03	Yes	B3T1G1	Yes	Yes	If you keep doing this and pusing the community in this way. You risk further eroding any trust the public has with our electyed bodies. You will also prove you can not be trusted to ever site another waste facility ever again. Or any other environmentally sensitive facility. A promise was made. Do not break this trust. LEAVE OTTER LAKE ALONE
