Read report City Engineer re Lockman Street improvement. Waddell property.

LOCKMAN STREET IMPROVEMENT.

February 23, 1897.

His Worship the Mayor:

Sir,—The Act authorizing the borrowing of money for the widening of Lockman Street did not lay down any definite plan for widening the street, and did not confine the expenditure to one side of the street. It was provided that a plan should be submitted to the council and approved by them, after which the street should be widened in accordance with such plan. The plan approved by the council provides for a finished street 65 feet in width. In order to obtain the full width and locate the new street to the best advantage it was necessary to take a portion of one or two properties on the west side which projected into the street. It was not considered advisable at the time of expropriating to take these properties. Since that time, however, the owners of the property north of Gerrish Street belonging to the estate of Robert Waddell have offered to sell the strip of land required, provided the city will pay a price proportionate to that paid for properties on the other side of the street. I would recommend that the land required as shown on the plan on file in this office, be purchased from the executors of the estate of Robert Waddell, and that His Worship the Mayor be authorized to negotiate for purchase and accept a deed of the property.

F. W. W. Doane, City Engineer.
