Implementing the Centre Plan

A plan for engaging stakeholders & the public to review the Draft Regional Centre Planning Document

Prepared by:
Urban Design Program Staff
2017-12-07
INTRODUCTION

PROJECT BACKGROUND

On June 13th, 2017, Halifax’s Regional Council unanimously approved the direction of the Centre Plan Framework to guide sustainable growth within the Regional Centre. The path forward includes separating proposed policy and regulations into two “packages”:

- Package “A” will focus on areas designated in the Centre Plan document as Centres, Corridors, Higher Order Residential, and Future Growth Nodes.
- Package “B” will include Established Residential Areas, Employment Areas (Institutional & Industrial), and Parks.

The Draft versions of the Secondary Municipal Planning Strategy (SMPS) and Land Use By-Law (LUB) for Package “A” are currently going through internal review in preparation for a public and stakeholder review period in early 2018. While Regional Council has adopted an overarching Engagement Strategy for this project, and Communications Strategies have been developed throughout to support engagement activities, the Community Design Advisory Committee (CDAC) has requested a detailed work plan outlining the who, what, where, and how of the consultation period for Package “A”.

ENGAGEMENT OVERVIEW

This document recommends who to engage and consult with, as well as how and when consultation should be done. A series of engagement tactics have been recommended as part of this approach. These tactics are meant to enable Centre Plan staff to target a variety of stakeholders within the designated consultation timeframe. This work plan speaks to the varying levels of technical understanding associated with the draft SMPS and LUB, and will give Centre Plan staff the meaningful feedback needed to bring Package “A” to final adoption phases.

With any project that is as technical and complex as a new set of land use policies and regulations, a clear set of messages must be crafted for the various stakeholder groups that are affected. To provide clarity and focus to the tasks at hand, part 2 of this report focuses on communications.

Initiated in 2015, the Centre Plan is supported by in depth background studies and policy creation with community and stakeholders. Municipal staff are at a critical point where the themes and core concepts identified can be adopted and implemented through the municipality’s planning and regulatory framework. Package “A” represents the first set of draft land use policies and regulations to begin implementation of the Regional Centre Planning Documents.
1. ENGAGEMENT TACTICS

The engagement tactics presented here are suggested based on needs currently identified and expected to arise as we release the Draft Planning Documents for Package “A”. They are meant to take place within the recommended dates, and are to be initiated in the recommended order that they are proposed. A total of eight (8) engagement tactics are presented and are listed as follows:

1-A: Centreplan.ca
1-B: Email/Telephone Responses
1-C: Roadshow
1-D: Industry Stakeholder Sessions
1-E: Storefront
1-F: Stakeholder Workshops
1-G: Public Open Houses
1-H: Stakeholder Days

Together, the eight tactics target a variety of stakeholders, and have been structured to achieve a spectrum of information sharing and information gathering.
1.1 ENGAGEMENT TIMELINE & DETAIL

This plan recommends techniques that will optimize municipal staff effort in providing excellent communication and consultation. The plan strives to engage with as many stakeholders as reasonably possible during the consultation period and authentically listen to the feedback we receive.

The anticipated timeline for reviewing draft Package “A” Planning Documents for the Regional Centre is January – April, 2018. It should be noted that although the formal consultation events recommended as part of this plan are set to conclude in April, engagement and information sharing will continue to be part of the formal adoption process. Figure 2 illustrates the anticipated engagement timeline for reviewing draft Package “A” Planning Documents for the Regional Centre.
1. Prior to release of Draft Regional Centre Planning Documents:
Provide information on background work, previous and future workplans, current project status, advertise for upcoming engagement events, and provide “Zoning 101” presentation if required.

2. After release of Draft Regional Centre Planning Documents:
Publish Package “A” on website and direct email and telephone inquiries to centreplan.ca.
Print copies of SMPS and LUB and make available for viewing at Storefront.
Alter Roadshow presentation to reflect content of Package “A”. Provide details of Package “A” when requested.

3. Final Day for Input:
Continue to provide information on work completed to date, project status, and anticipated timelines.
Inform public of further opportunities for participation via formal adoption process.

      |                                                                                                      |
| MATERIALS NEEDED |  
      | ▪ PowerPoint,  
      | ▪ Handouts summarizing engagement opportunities and project timeline.  
      | ▪ Handouts sharing the details of Package “A” that are available at the time of the session.  
      |                                                                                                      |

**PRESENTATION FORMAT**

- Begin the presentation identifying the importance of Centre Plan, and the importance of having a comprehensive plan in place. Communicate the benefits of having a predictive process.
- Review 8-10 key issues coming out of Package “A” that municipality knows UDI will be interested in.
- Emphasis on upcoming engagement opportunities – advertise stakeholder workshops, Open Houses, and Stakeholder Days event.
- Overview of path forward and when Package “A” will be available for them to review specifics.
- Allow industry to ask the questions and have discussion on key areas of Package “A”.
- Provide specifics on communication and outreach.
### 1-E: STOREFRONT

| WHAT | Establish a central “storefront” location that is equipped with all Regional Centre Planning Document material, and staffed by municipal Centre Plan team. Storefront location is meant to accommodate drop-ins from members of the public, stakeholders, or anyone interested in learning more about the project. |
| WHO | Industry, Community Groups, Business Communities, Advocacy Groups, Members of the Public |
| WHEN | Middle of February |
| WHERE | Central, somewhere visible and accessible to the public. |
| WHY |  - To optimize staff resources in engaging with stakeholders and the public.  
  - To give physical presence and “readiness” to the project.  
  - To highlight and provide transparency and access on the project.  
  - To give Centre Plan staff a central location to work from and interact with visitors.  
  - To have print information/material centrally located and available for display and hand-out.  
  - To keep communication open between Centre Plan staff and all stakeholder groups. |
| HOW |  - Find storefront that is central (e.g. Halifax or Alderney). Must be visible and accessible to the public during day time hours.  
  - Communicate location and hours of operation with the public via media blasts, online content, and social media. |
| MATERIALS NEEDED | Print material for display and handouts as they become available. |

2. KEY MESSAGES

The Centre Plan is entering the phase where the policy direction approved in June of 2017 will be turned into policy and regulations. The policy and regulations for the Package “A” areas will codify the core concepts that will define the Regional Centre:

2.1 COMPLETE COMMUNITIES

The Draft Regional Centre Planning Documents (Package “A”) supports Complete Communities by proposing Policy, Mapping and Zones promoting:

- Mixed use and development that allows people to safely and conveniently access the goods and services they need in their daily lives, all within a short journey.
- Proposing higher density mixed-use zones and by encouraging infill and a variety of housing forms to provide the necessary number of people to support a variety of businesses, services and public amenities, such as parks.
- Providing the regulations to create and reinforce a range of special, distinct places.

2.2 HUMAN SCALE DESIGN

The Draft Regional Centre Planning Documents (Package “A”) recognizes how the variety of places and experiences in the Regional Centre of the Halifax region are valued and supports Human Scale Design by proposing Policy, Mapping and Zones promoting:

- Moderately sized buildings, as well as taller buildings with a lower scale podium and architectural detailing to create an intimate environment and comfortable experience.
- Retaining a community’s character placing larger scale buildings in Corridors, Centres and Growth Nodes and requiring massing changes to properly transition to adjacent lower scale zones.
2.3 PEDESTRIANS FIRST

The Draft Regional Centre Planning Documents (Package “A”) prioritizes the needs and comfort of pedestrians in all seasons and supports placing the Pedestrian First by proposing Policy, Mapping and Zones promoting:

- Connected streets, short blocks, four-way intersections, hard surfaced pathways and an extensive sidewalk network.
- Sidewalks, paths and other pedestrian connections should link to key destinations such as retail and services, employment centres, schools, and public transit stops.
- Urban trees, parks and other open spaces, lively storefronts, and places to rest and visit make walking easier and more enjoyable.
- Design standards supporting pedestrian activity by providing mobility choices that balance the needs and safety for all modes of transportation, with a commitment to encouraging greater active transportation opportunities.

2.4 STRATEGIC GROWTH

The Draft Regional Centre Planning Documents (Package “A”) supports socially, economically and environmentally responsible growth by proposing Policy, Mapping and Zones promoting:

- Predicable growth within the Regional Centre (18,000 new households) which could potentially realize $600 million in savings by the year 2031.
- Increasing the density and diversity of people, shops and services in the Centre to enliven urban neighbourhoods and support interesting, resilient and safe communities.
- Growth in Centres, Corridors and Growth Nodes in the form of moderate height buildings, with tall buildings located strategically.
- Reduction of red tape and staff time by replacing four sets of Community Plans with one modernized and standardized set.
2.5 EVALUATION TOOLS

To gain the understanding of the success of the consultation efforts, below are various evaluation tools that should be utilized. These tools are aimed to ensure stakeholders are aware of the required changes.

1/ Web trend analysis - # visits, access – track web page hits and searches
Use web analytics to determine the amount of volume to web page and the amount of time spent there.

2/ Comment summary
The project team will record and measure input form stakeholders and community members and the municipal response.

3/ Information session attendance and record input
Counting stakeholders attending the information sessions as well as questions or comments from the people attending will enable the team to evaluate and edit the planning documents.
