On behalf of Regional Council, I am pleased to present Halifax Regional Municipality's new Public Safety Strategy, 2018-2022.

This comprehensive strategy represents a range of public and professional input on the many factors that contribute to safety and a sense of personal well-being within the more than 200 communities that make up our municipality.

The culmination of many months of dedicated work by Halifax's Public Safety Office and others, the strategy has at its foundation four strategic priorities: Crime prevention and reduction, strengthening communities, resident resilience, and ensuring safe places.

While the strategy speaks to the root causes of crime and the pressing need to address these determinants in a sustained way, it also contains recommendations for specific action to make our municipality safer.

The success of this strategy will be measured not simply against crime statistics, but in the ability of people of all backgrounds and from all neighbourhoods to partake freely in our shared community.

I would like to thank the Public Safety Office, staff throughout our municipality who lent their knowledge and expertise, and the many other wise voices that are reflected in this strategy.

The adoption of this strategy will help us build a safer, more resilient and more liveable Halifax Regional Municipality.

Kind regards,

tille Swage

Mike Savage Mayor

#### **Executive summary**

The Office of Public Safety was created to support the municipality in developing and implementing a strategic framework – weaving public safety practices and principles into policies, business plans, performance expectations, programs and services. Building the public safety framework began with a comprehensive review of safety promotion and crime prevention best practices. Our 11 guiding principles and assumptions grew out this review and became the backbone for the strategy.

From the early on, it was clear that the approach needed to be comprehensive, collaborative and upstream oriented. The strategy's four stages of intervention acknowledge that while reacting in the moment is critical to limit harm, real success will come in preventing harm from happening in the first place.

While the strategy addresses crime reduction, the strategy's safety lens is broader than crime. Public safety includes not only feeling safe and secure, but also being able to safely take part in community life and enjoy municipal programs and services.

The strategy is informed by a rich history of research into root causes of crime. It focuses on reducing risk factors and promoting protective factors linked to criminality and victimization (including education, employment, income, housing, food security, mental health, parenting and early childhood development).

We have chosen to concentrate our efforts where the municipality has both the authority and capacity to act. The strategy's 16 objectives and 76 actions relate to aspects of residents' lives that the municipality can impact in a meaningful way. In some cases, the strategy reaches into spheres where the municipality plays a minor role – doing so when the risk and protective factors involved were too important to be ignored.

Effective public safety promotion involves a multi-sectoral approach and the involvement of not only other levels of government, but the corporate sector, the non-profit sector and communities. While the strategy identifies municipal leads, it also identifies key stakeholders. A collaborative and coordinated tact is needed, especially in those spheres where the municipality does not have a service delivery or regulatory role to play. The strategy identifies four strategic priorities, as follows:

**BUILD RESIDENT RESILIENCE:** Help people to reduce their sense of isolation, build resilience and improve their quality of life.

**ENSURE SAFE PLACES:** Reduce the opportunities for crime and social disorder at places where people live, work and play.

STRENGTHEN COMMUNITIES: Increase local participation and social interaction, and develop ways to deal with conflict in non-violent ways.

PREVENT AND REDUCE CRIME: Protect citizens, organizations, and institutions against threats to their well-being and prosperity.

Informed, committed leadership, shared responsibility and individual accountability are essential to our public safety efforts. Effectiveness will depend on employees fulfilling their roles, and the municipality's leadership (staff, council and mayor) providing guidance, resources and support.

#### How we got here

In response to concerns that violent crime in Halifax was escalating, the Mayor's Roundtable on Violence was created in 2006. In 2008, Council received a consultant report that identified and analyzed patterns of violence and tabled recommended actions to improve public safety in Halifax<sup>1</sup>. Following that report, Halifax created a Public Safety Office and developed a public safety strategic plan<sup>2</sup>. In 2014, Council received a follow-up consultant report that provided an analysis of local data on violence and public safety, reviewed progress made and identified persisting and emerging public safety issues<sup>3</sup>. In response to that report, work on a renewed public safety strategy began.

#### Why the municipality

Crime and public safety are challenges confronting all Canadian municipalities. The traditional approach of responding to those challenges through policing and criminal justice is gradually being complemented by a larger notion of community safety that calls for a diversity of preventive initiatives, the mobilization of local stakeholders and public engagement. This reflects the complexities of the nature and causes of crime and insecurity as well as their links with other global challenges related to the social and economic development and the management of urban centres. Municipalities are the level of government closest to neighbourhoods, communities and citizens. They provide many direct services and programmes that enhance community safety, from community policing to safe urban design and support for vulnerable groups. They are in a strategic position to mobilize local stakeholders, to ensure coordination of crime prevention efforts and to interface in that regard with other levels of government. In that perspective, local authorities are called to play a key role in fostering an integrated approach to reduce and prevent crime and insecurity<sup>4</sup>.

#### Asking the right questions

As we developed the public safety strategy, it was important to ask the following questions:

- What situation do we wish to change?
- What are the main aspects of this problem?
- What are its causes?
- What should our objectives be?
- What action should we take?
- How do we measure whether we have achieved the objectives set?

We owe our children — the most vulnerable citizens in any society — a life free from violence and fear. ~ Nelson Mandela

#### Purpose of the strategy

Halifax's public safety strategy will guide the development and implementation of results focused, evidence-based strategic initiatives. Its purpose is to support the mayor, city councillors, and the managers of municipal services, in their efforts to provide a safe and secure environment for residents. More specifically, the strategic framework is intended to:

- Promote a better understanding of the nature and causes of crime and insecurity.
- Support a coordinated approach to addressing public safety (including new and emerging problems).
- Encourage an improved level of stakeholder collaboration.
- Advance principles of good practice in prevention and intervention.
- Foster increased commitment to safety promotion at all levels of government and across sectors.
- Guide the allocation of municipal resources to achieve the greatest impact.

We know public safety is measured not simply by the absence of crime, but also by the presence of fairness and justice. ~ Ronald L. Davis

#### **Guiding principles and assumptions**

Halifax's Public Safety Strategy is guided by a vision of a safe city where we collectively create, and continually improve upon, the conditions that enable all of us to enjoy the highest level of safety and security possible. Several guiding principles and assumptions have shaped the development of the strategy and will continue to guide the work as it moves forward.

Holistic understanding of public safety: The social determinants of health form the building blocks of healthy, liveable, safe cities.

**Proactive and upstream oriented:** Our approach to public safety must be grounded in upstream thinking and prevention needs to be given priority.

**Safety and well-being for all:** A "for all" lens will help ensure that we pursue initiatives that are inclusive and focused on those most vulnerable to trauma and victimization.

**Safe environments:** All people have the right to live in a safe environment, secure from threats to their personal safety and well-being.

**Respond promptly to acute crises:** We must be prepared to immediately respond to urgent incidents to stop harms, minimize victimization and hold individuals responsible.

Adapt to emerging trends: As the public safety landscape changes, we must adapt and evolve our responses to new and emerging public safety threats.

**Resiliency is key:** Public safety increases when we enhance the capacity of individuals, communities and organizations to survive and become more resilient.

**Monitor, evaluate and communicate:** We need to track metrics to assess our progress, make changes based on evaluation, and communicate the results.

**Public safety is everyone's business:** Safety and security must involve the broader public, private and civil sectors, and include meaningful involvement of those most affected.

#### **Evidence based action and investment:**

Priority will go to investments and actions that are grounded in evidence, realize value for our efforts, and move us toward meeting our targets.

**Enable collective impact:** Our efforts need to be collaborative and coordinated – both among municipal business units and with external partners.

An ounce of prevention is worth a pound of cure ~ Benjamin Franklin

### THE VISION Communities where everyone is safe to live, work, learn and play.

# The main of the second second

#### **Spectrum of action and intervention**

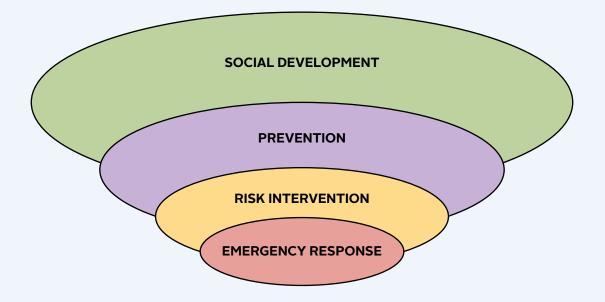

Halifax's public safety framework incorporates four stages of action to reduce crime, increase individual and community resilience and improve community safety<sup>5</sup>. The intent is to prevent harm and victimization, whether the risk is faced by a person, a family, or a neighbourhood. The strategy takes a holistic and upstream-focused approach that seeks to reduce risk factors and increase protective factors. Our strategic actions incorporate situational prevention, general prevention and targeted prevention tactics to promote public safety.

**SOCIAL DEVELOPMENT:** Intervening to reduce risk factors and/or enhance protective factors in the general population.

**PREVENTION:** Identifying at-risk individuals or communities and intervening to reduce risk factors and/or enhance protective factors.

**RISK INTERVENTION:** Responding to acutely elevated risk situations to mitigate harm and decrease the likelihood of (re)victimization.

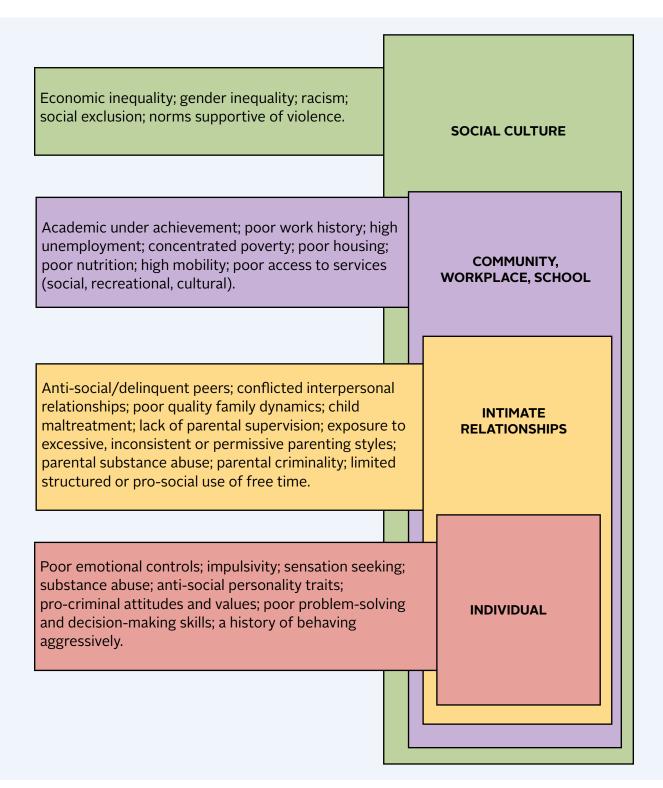

**EMERGENCY RESPONSE:** Immediate response to urgent incidents to stop harms, minimize victimization and hold individuals responsible.

#### **Risk factors**

Negative influences or circumstances in the lives of individuals, groups of persons, or communities. These may increase the presence of crime, victimization and/or fear of crime in each community and may also increase the likelihood that individuals engage in crime and/or become victims<sup>6</sup>.

#### **Protective factors**

Positive influences or circumstances that can improve the lives of individuals or the safety of a community. These may decrease the likelihood that individuals engage in crime and/or become victims. Building on existing protective factors makes individuals and communities stronger and better able to counteract risk factors<sup>7</sup>.

| Policies that reduce economic and social<br>disparities and are inclusive in their approach<br>(e.g., gender, ethnicity, culture, language<br>and ability)  |    |   | SOCIAL CULTURE                  |

|   |    |   |                                 |

12 HALIFAX

#### Safety promotion tactics General prevention

General prevention programs include a wide range of activities or interventions aimed at preventing harms from occurring, or reducing risks or threats to health and wellbeing. They target either the entire community, or large subgroups within the community, providing education and awareness<sup>8</sup>.

#### **Targeted prevention**

Targeted prevention programs are focused on specific groups of people who will benefit most from the program activities and interventions because they are more at risk than the general population. Targeted prevention may provide education and awareness to prevent harm and to promote wellbeing, or the program may be designed to increase safety and protection to help prevent further harms from occurring<sup>9</sup>.

#### **Situational prevention**

Situational prevention programs are designed for specific places that are vulnerable to crime, fire, or other public safety risks. Situational prevention employs specific and site-based techniques and mechanisms that deter crime, or make it more difficult for crimes or other harms to occur<sup>10</sup>.

Safety and security don't just happen, they are the result of collective consensus and public investment. ~ Nelson Mandela

#### **Priorities, Objectives and Actions**

At the heart of Halifax's public safety strategy is a focus on building communities where everyone is safe to live, work, learn and play. The strategy's 4 priorities, 16 objectives and 76 actions are designed to promote protective factors and to reduce risk factors. As such the strategic actions apply to individuals, to groups, to social environments (such as workplaces, schools and communities) and to societal norms.

Our strategic framework revolves around acting early and often on the spectrum of intervention and prevention. This approach is driven by the following:

• Risk factors have a cumulative effect. The more risk factors a person must deal with, the more likely it is that he or she will commit a crime, witness a crime or suffer a violent act.

• Early exposure increases risk. The tendency to commit crime is higher among those who have committed a first offence earlier in life and who have committed several crimes during adolescence<sup>11</sup>.

- Duration of exposure is significant. The longer a person is exposed to risk factors, the higher the likelihood of later committing a crime or being victimized.
- Protective factors offset risks. Protective factors make individuals and communities stronger, more resilient and better able to cope with risk factors.

#### 4 PRIORITIES 16 OBJECTIVES 76 ACTIONS

Halifax's public safety strategy addresses a broad range of risk and protective factors from parenting, to housing and food security, to social isolation and exclusion, to educational attainment and workforce attachment. The strategy calls on the municipality and stakeholders to adopt prevention-focused tactics to improve resident resilience, make places safer and strengthen community cohesion. Improving public safety will require a collective effort to improve the safety and security of all residents.

Our strategic approach starts with the general population, but does not neglect those at elevated risk, or those who have already suffered victimization or offended. Halifax's commitment to public safety must be inclusive and recognize that intervention needs to be tailored to residents' needs – whatever stage in life they may be at and whatever their degree of safety and security.

#### **Strategic priorities**

#### **BUILD RESIDENT RESILIENCE**

1.1 Connect residents to quality jobs1.2 Help children and youth succeed at school1.3 Improve residents' mental health1.4 Build child and youth resilience

#### **ENSURE SAFE PLACES**

2.1 Preserve and grow the supply of affordable and emergency housing2.2 Enhance access to arts, culture, recreation and natural assets2.3 Improve mobility so that people can learn, play and work more effectively2.4 Make places and spaces safe and beautiful

#### **STRENGTHEN COMMUNITIES**

3.1 Support residents in parenting and mentorship

3.2 Improve access to healthy, affordable food

3.3 Make programs, services and facilities more inclusive

3.4 Enhance community cohesion and engagement

#### PREVENT AND REDUCE CRIME

- 4.1 Decrease violent crime and criminal involvement
- 4.2 Divert and reintegrate offenders
- 4.3 Reduce the availability and harmful use of alcohol and drugs
- 4.4 Decrease inter-personal violence, abuse and neglect

#### Accountability and capacity to act

A strategic approach to public safety requires thinking about what we want to accomplish and whether we are well positioned to accomplish those goals. To do that, we must think about accountability (legislative mandate) and capacity to act (resources, knowledge, skills). In developing Halifax's public safety strategy, emphasis has been put on those areas where the municipality has both accountability and capacity to act to improve public safety. Halifax's public safety strategy, however, acknowledges that safety and security is not the sole responsibility of municipal government. For any given public safety issue or scenario, the municipality may have a primary, shared or complementary role to play<sup>12</sup>.

#### Primary

Municipality has a primary responsibility and, as a stakeholder, has a central role.

- High accountability
- Strong capacity
- Significant municipal role required to achieve community goal(s)

#### Shared

Municipality is one of a few or many responsible stakeholders.

- Accountable for some aspects
- Some capacity
- Moderate municipal role required to achieve community goal(s)

#### Complementary

Other stakeholders share most responsibility. Municipality plays a supporting role

- No formal mandate
- Limited capacity
- Small municipal role required to achieve community goal(s)

#### Legend

Municipal role 🔺 Stakeholder role

When kids flourish, crime doesn't

~ Canadian Council on Social Development

#### **Municipal roles**

Within these three levels of responsibility (primary, shared, complimentary) the municipality can play multiple roles. The municipality may act in one or more of these roles at a given time and can coordinate roles. Halifax's public safety strategy calls for municipal involvement in a variety of roles across the spectrum of public safety promotion and crime prevention.

**Provider:** Provide services directly to our clients.

**Planner/Regulator:** Develop plans, policies and regulations that affect municipal actions and the actions of others.

**Capacity builder:** Improve the ability of other organizations to deliver and partner on shared goals.

**Convener:** Draw people and organizations together to explore, strategize and work through opportunities and challenges.

**Coordinator:** Help individuals and organizations to coordinate initiatives, programs and funding.

**Educator:** Communicate, support and develop knowledge and understanding.

**Funder:** Provide funding to other organizations to do their work (using existing funding mechanisms).

Advocate: Influence decisions and policy through an organized effort.

#### **Priority Outcome Teams**

Priority Outcome Teams are comprised of staff from relevant Business Units who share responsibility for achieving Regional Council's Priority Outcomes (Economic Development; Governance & Engagement; Healthy, Liveable Communities; Service Delivery; Social Development; and Transportation) for our community. Priority outcome teams were chosen to align staff accountabilities because they are best placed to add value and promote shared responsibility for public safety. The teams have mandates either closely or loosely connected to our strategic actions.

From an operational standpoint, the expectation is that strategic actions (assigned to priority outcome teams in the tables below) will be reflected in relevant business units' practices, policies, performance expectations and business plans. Business units may act as a service provider, a planner, a regulator, a capacity builder, a convener, a coordinator, a funder, an educator or an advocate. These municipal roles are not exclusive – a business unit may take on multiple roles to advance public safety within in their sphere of influence.

#### **Key Stakeholders**

For each strategic action key stakeholders have been identified. These stakeholders play a role in how safe and secure residents are and in how safe and secure residents feel. The municipality can not be held accountable for the action or inaction of stakeholders. It can, though, be held accountable for a failure to reach out to stakeholders to move the public safety agenda forward. We can accomplish more by collaborating than we can accomplish by acting alone.

#### Indicators of success

We have chosen indicators to help track how well we are doing in fostering a safe place to live, work, learn and play. Data may already be collected by the municipality, may be freely available from other organizations, or may need to be developed.

The measures represent a mix of specific and general trend data meant to form a complete public safety picture. Many of the public safety indicators selected measure the personal side of quality of life and personal safety and security.

Indicators have not been assigned to every action identified in the public safety strategy. They do, however, focus attention on the end goal – safe, liveable communities. As we move forward with the strategy's implementation, we may need to develop more, or different, indicators.

A ship in harbor is safe, but that is not what ships are built for. ~ John A Shedd

#### Acknowledgments

Thank you to the nearly 5,000 individuals and organizations that participated in public safety consultations between 2008 and 2014. Insights gathered through online and telephone surveys, one-on-one interviews and focus groups, led to the recommendations made by Don Clairmont and his collaborators (Kit Waters, Chris Murphy, Verona Singer, Stephen Kimber, Don Spicer, John Peach and Stephen Schneider). Their collective roundtable work served as the foundation for the 2018-2022 Public Safety Strategy. In forging a direction for public safety, advice and input from municipal staff played a key role in strengthening the renewed strategy.

The Halifax Regional Municipality would also like to acknowledge individuals in other regions who have blazed a path in the design and delivery of comprehensive community safety strategies. Their pioneering efforts have helped shape the public safety landscape across Canada and influenced Halifax's strategy. We owe thanks to Surrey, Red Deer, Ottawa and Toronto for allowing Halifax to adopt concepts and models from their public safety strategies. A debt of gratitude is also owed to the Canadian Municipal Network on Crime Prevention (CMNCP), which has been invaluable in offering guidance and support as Halifax's renewed public safety strategy was completed.

MAKING HALIFAX A SAFE PLACE TO LIVE, WORK, LEARN AND PLAY
