

We need your support
Lady Drive Her Car Service

We are planning to attend a meeting to present our petition in front of you: The City Council, the Mayor and if at all possible the Taxi Commission first part of June this year. We may not have enough time there to say all we want. This is a little introduction to our cause and movement.

Many of us women want the public to know that there are ladies working a service to and from the Halifax Airport in a male dominated industry and have been for several years. If the public feels more comfortable with a Lady Drive Her, they now have a choice.

We have been seen on local news channels and the radio more than once. I have not contacted The media for any of these interviews. They contact me because they see a story here mainly because of the taxi driver acquittal's lately involving assault's on women. Also in the beginning I was saying let us jump the cue and ask for roof-lights for ladies so we can work the HRM, but that doesn't sit well with city taxi drivers, so another reason why the Media contacts me because that is also news savvy.

Every second phone call I receive, the public, asks me if we can do a taxi runs in the city. Which we can't provide because we support the airport. We need City roof-lights for Ladies to work the HRM and for them be legal and licensed by the HRM to operate. BUT!..... these roof-lights are capped, with waiting lists years long. I stopped saying we want to jump the cue, I want to create and ask for something not in existence, never before done in any city across Canada, **"a new category"** so we can provide this service. The Taxi Commission has undergone an independent review, because they know something needs to change. We are open for discussion, let's put our heads together, give the public what it wants & needs.
